

THE IMMORTAL ARMIES

These datasheets allow you to fight Apocalypse battles with your Necrons miniatures. Each datasheet includes the characteristics profiles of the unit it describes, as well as any wargear and special abilities it may have.

KEYWORDS

Throughout these datasheets you will come across the <DYNASTY> keyword. This is shorthand for a keyword of your choosing, as described below.

<DYNASTY>

Most Necrons belong to a dynasty. Some datasheets specify what dynasty a Necrons unit is drawn from (e.g. Kutlakh the World Killer is from the Maynarkh Dynasty, and so has the **MAYNARKH** keyword), but where a datasheet does not, it will have the <DYNASTY> keyword. When you include such a unit in your army, you must nominate which dynasty that unit is from. You then simply replace the <DYNASTY> keyword in every instance on that unit's datasheet with the name of your chosen dynasty.

For example, if you were to include a Gauss Pylon in your army, and you decided it was from the Nihilakh Dynasty, then its <DYNASTY> keyword is changed to **NIHILAKH**, and its Phase Shift Generator ability would then say 'Re-roll saving throws of 1 for friendly **NIHILAKH INFANTRY** units whilst they are within 6" of this unit.'

Once the tile has been placed, this unit is treated as an Obstacle and is not considered to be a unit for any rules purposes, with the exception of the Ziggurat Deck ability, until the first turn begins. When this unit is destroyed it is not removed from the battlefield: instead it is treated as a Defensible Terrain feature and is not considered to be a unit for any rules purposes.

Ziggurat Deck: When setting up your army, if this unit is in your deployment zone, a single friendly <DYNASTY> MONOLITH or <DYNASTY> SENTRY PYLON can dock with the Tomb Ziggurat. If they do so, place the model on the Tomb Ziggurat. Whilst a unit is docked with the Tomb Ziggurat, add 1 to wound rolls for attacks made by that unit with ranged weapons. Whilst a unit is docked with the Tomb Ziggurat, it is never Out of Command: an Out of Command marker is never placed next to it.

Eternity Gate: During deployment, you can set up any number of <DYNASTY> INFANTRY units on their tomb world. Such a unit is considered to be set up in Tactical Reserves. When a unit that was set up on its tomb world arrives as reinforcements, you must select one friendly <DYNASTY> MONOLITH, <DYNASTY> NIGHT SCYTHER or <DYNASTY> TOMB ZIGGURAT unit for it to deploy from; set up the arriving unit within 6" of the selected unit. If it is impossible to do so, you cannot set up that unit this turn. Each MONOLITH, NIGHT SCYTHER and TOMB ZIGGURAT unit can only be deployed from once per turn. No more than half the total number of units in your army can be set up in Tactical Reserves.
