THE DESTROYER OF WORLDS

These datasheets allow you to fight Apocalypse battles with your Tyranid Hive Fleets miniatures. Each datasheet includes the characteristics profiles of the unit it describes, as well as any wargear and special abilities it may have.

KEYWORDS

Throughout these datasheets you will come across the <**Hive Fleet**> keyword. This is shorthand for a keyword of your choosing, as described below.

<HIVE FLEET>

All Tyranids belong to a hive fleet. If a Tyranid Hive Fleets datasheet does not specify which hive fleet it is drawn from, it will have the <**Hive Fleet**> keyword. When you include such a unit in your army, you must nominate which hive fleet that unit is from. You then simply replace the <**Hive Fleet**> keyword in every instance on that unit's datasheet with the name of your chosen hive fleet.

For example, if you were to include a Malanthrope in your army, and you decided it was from Hive Fleet Kraken, then its <**Hive Fleet**> Faction keyword is changed to **Kraken**, and its Shrouding Spores ability would then say 'Friendly **Light Kraken** and **Heavy Kraken** units have the Stealth ability whilst they are within 6" of this unit.'
