## ASTRA MILITARUM

## SOLDIERS OF THE IMPERIUM

These datasheets allow you to fight Apocalypse battles with your Astra Militarum miniatures. Each datasheet includes the characteristics profiles of the unit it describes, as well as any wargear and special abilities it may have.

## KEYWORDS

Throughout these datasheets you will come across the <Regiment> keyword. This is shorthand for a keyword of your choosing, as described below.

## <REGIMENT>

Most Astra Militarum units are drawn from a regiment. Some datasheets specify which regiment the unit is drawn from (e.g. Sergeant Harker has the Catachan keyword, so is drawn from the Catachan Regiment), but where a datasheet does not, it will have the <Regiment> keyword. When you include such a unit in your army, you must nominate which regiment that unit is from. You then simply replace the $<$ Regiment $>$ keyword in every instance on that unit's datasheet with the name of your chosen regiment. Units with the Militarum Tempestus keyword treat this as
their <Regiment> keyword in all respects, but the Militarum Tempestus keyword cannot be used to replace the <Regiment> keyword on any other datasheet.

For example, if you were to include a Command Squad in your army, and you decided it was from Vostroya, its <Regiment> Faction keyword is changed to Vostroyan and its Regimental Standard ability would then read: 'Add 1 to the Leadership characteristic of Vostroyan units whilst they are within 6 " of any friendly Vostroyan units with a Regimental Standard.'
