CONGREGATIONS OF WAR

These datasheets allow you to fight Apocalypse battles with your Adeptus Mechanicus miniatures. Each datasheet includes the characteristics profiles of the unit it describes, as well as any wargear and special abilities it may have.

KEYWORDS

Throughout this section you will come across the **<Forge World>** keyword. This is shorthand for a keyword of your own choosing, as described below.

<FORGE WORLD>

Most of the forces of the Adeptus Mechanicus belong to a forge world. If an Adeptus Mechanicus datasheet does not specify which forge world it is from, it will have the **<Forge World>** keyword. When you include such a unit in your army, you must nominate which forge world that unit is from. You then simply replace the **<Forge World>** keyword in every instance on that unit's datasheet with the name of your chosen forge world.

For example, if you were to include a Terrax-pattern Termite Assault Drill in your army, and you decided it was from Lucius, then its **<Forge World>** keyword is changed to **Lucius**, and the first sentence of its Transport ability would say 'This unit can transport up to 12 friendly **Secutarii Infantry** or **Lucius Infantry** models.'
